# Newly Designed 10.1 UI

## Renewed user interface panel design NEW

#### Newly Designed AP/DC-VII UI

AP/DC-VII adopts 10.1 inch UI touch panel which improves user convenience, visibility, and response time.

User can adjust panel to the desired angle and its quick touch response rate provides comfortable usability.

- Built-in 10.1 inch touch panel display
- Smart control panel without hard keys
- Portable UI supporting mobile work orders
- Built-in NFC (Near Field Communication) supporting Android/iOS
- Support flexible touch like tablets
- Support J/E/SC/TC/K/TH/V languages on the display
- Support operation status attention light and sound
- Tilt mechanism allows adjustment of the UI panel angle

#### Operation status Attention LED

#### Alert tone feature

#### Free angle adjustment

Built-in NFC (supporting Android/iOS)

# Newly Designed 10.1 UI

## Renewed user interface panel design NEW

#### Existing AP/DC-VI UI

- 9-inch pressure sensitive touch panel
- Hardware keypads are confusing
- Support NFC options

## Competitor UI

#### [Sindoh KM OEM]

- 10.1-inch Color LCD
- Support custom UI for each user
- Support NFC (Android only)
- Support Bluetooth LE as an option (iOS only)
- Do not support Portable UI

#### [Sindoh\_Ricoh OEM]

- 10.1-inch Color LCD
- Support Ricoh Smart Device Connector (Portable UI feature of AP/DC-VII)
- Support custom UI for each user
- Support Bluetooth LE (Android and iOS)

#### [Canon]

- 10.1-inch Color LCD
- Support custom UI for each user
- Support NFC as an option (Android only)
- Support Bluetooth LE as an option (iOS only)
- Do not support Portable UI

## Portable UI

## Mobile operation without touching MFD UI NEW

- New ways to operate MFD using Portable UI
- Allow users to operate MFD with mobile devices

Download from App Store or Google Play (available in iOS 11 or later)

Touch and start work via mobile devices

Favorites available on multiple devices

#### **Key Features**

Basic tasks such as copying, scanning and faxing are performed on Android TM and iOS devices.

Work can be initiated by touching MFD directly, so workflows are not interrupted like waiting in line to do direct operation on MFD

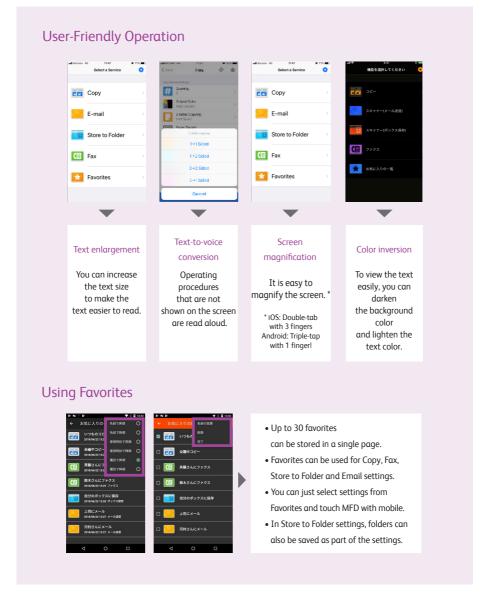

Operational support is provided through accessibility features of mobile devices and automatic voice guidance capabilities to allow visually-impaired users to sit in a wheelchair and manipulate the screen.

Frequently used features can be registered as Favorites for easier and faster retrieval in future.

## Portable UI

## Mobile MFD operation without touching UI NEW

# Smart Help / Remote Assistance

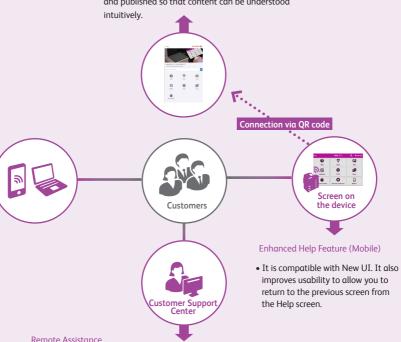

Viewing of error contents on mobile via QR code and Remote Assistance

- Product information is accessible via mobile devices in addition to product documentation and DVD.
- Quick troubleshooting is available through the official website, Help feature and Remote Assistance.

#### Enhanced Help Feature

• Updated video from existing reading materials and published so that content can be understood

Remote Assistance

- Our Customer Support Center operator remotely accesses the customer's MFD control panel screen.
- Our operator guides the customer using finger pointer, pen, etc. while viewing the screen remotely.

# Smart Help / Remote Assistance

Viewing of error contents on mobile via QR code and Remote Assistance

#### Existing AP/DC-VI UI

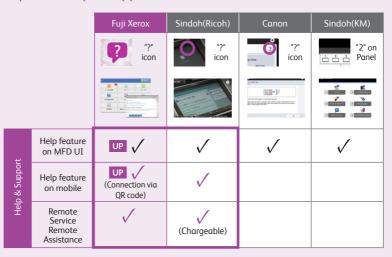

- The Mobile button is added to the Help feature on the MFD screen.
- The QR code for accessing the Help website is displayed.
- Help information is available even if MFD is not available.

• The link button with Help information is added to the error screen for troubleshooting errors.

#### Competitor Help & Support

# Security Enhancement

Security Enhancement for Protection of Customer Information

Enhanced

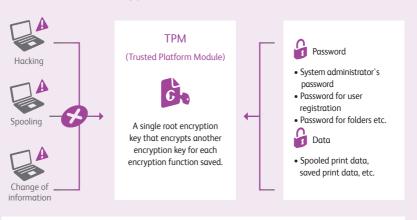

### Meeting Requirements Specified in HCD PP v1.0

#### [Explanation]

- IPA announced the use of Hardcopy Device Protection Profile 1.0 (HCD PP v1.0) as security requirements when the government purchases digital multifunction devices.
- Our MFDs meet both IEEE 2600 and HCD PP v1.0.

#### Enhanced MFD Encryption via TPM

#### [Explanation]

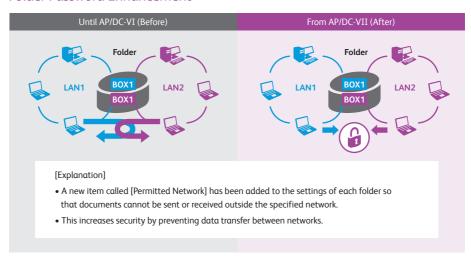

- MFD's encryption key management is enhanced by adopting TPM (Trusted Platform Module).
- The root encryption key is saved in the TPM tip for the key protection, which enhances device security compared to previous models.
- A string for hard disk encryption is no longer needed.

# Security Enhancement

Security Enhancement for Protection of Customers' Information

Enhanced

#### Folder Password Enhancement

#### Supporting SFTP

#### Features that can use SFTP Features that cannot use SFTP · Job Flow for files stored in folders • Task on [Scan to PC] on Home screen • Job flow sheets that use SFTP can only be • Task on [Job Flow Sheets] on Home screen created from CentreWare Internet Services. ScanAuto Custom Scan Scan Delivery You cannot select SFTP as the transmission • Paperless Fax Delivery protocol for job flow sheets created using MFD or job flow creation tool. • Creating an address book on CentreWare Internet Services [Explanation] • Documents can be transmitted using the SFTP protocol. • Support SFTP protocol for enhanced security when sending scanned documents to a computer. • SFTP (Security File Transfer Protocol) is a protocol for transmitting files via an SSH-encrypted path.

## **Enhanced Scan Feature**

Improved scan speed and automatic detection of non-standard size

NEW Enhanced

## Improved scan speed and detection of mixed size originals

AP/DC-VII supports the best scan speeds compared to competitors and detects mixed size originals.

	Fuji Xerox	Sindoh(KM)	Sindoh(Ricoh)	Canon
	1 Sided: 135 ipm 2 Sided: 270 ipm (C6673 or later)	1 Sided: 120 ipm 2 Sided: 240 ipm (D720 or later)	N/A	1 Sided: 80 ipm 2 Sided: 160 ipm (All Models)
Scan speed	1 Sided: 80 ipm 2 Sided: 160 ipm* (C5573 or earlier) *Low noise mode 154 ipm	1 Sided: 80 ipm 2 Sided: 160 ipm (D710 or earlier)	1 Sided: 80 ipm 2 Sided: 160 ipm (D432, D431, D430)	
Mixed size originals detection	NEW	Option (D720, D721, D722)		(All Models)

#### Supporting non-standard size scan for receipts

Until now, when scanning non-standard sized documents, you had to manually size them but AP/DC-VII [Auto Detect] feature supports automatic scanning to the nearest standard size.

# **User-Friendly Operation**

## Improved tray/DADF and Attention Light for user-friendly operation

NEW Enhanced

#### Envelope Folder Tray to support envelope and postcard printing

By replacing Tray 1, which is the standard tray, with the Envelope Folder Tray (Option), you can print a large number of envelopes and postcards.

## Retractable tray and DADF close automatically with a gentle push

AP/DC-VII's retractable tray and DADF close gently without being pushed in all the way.

 $^{st}$  Retractable DADF applies to 6673/7773 model only.

#### Attention Light shows print status of Center Tray

When delivering output for print, copy, or fax jobs to Center Tray, attention light is automatically lit in addition to the UI LED and alert tone can be heard to notify users of the print status. This prevents documents from being neglected after printing.

Center Tray print status attention light

UI operation status LED

Operation alert tone

# SWG Configuration & Frequently Asked Questions

## Frequently Asked Questions (Q&A)

What is different from existing AP/DC-VI's Configuration?

: 3rd Party Solution / New Solutions have been added.

Are local solutions not included?

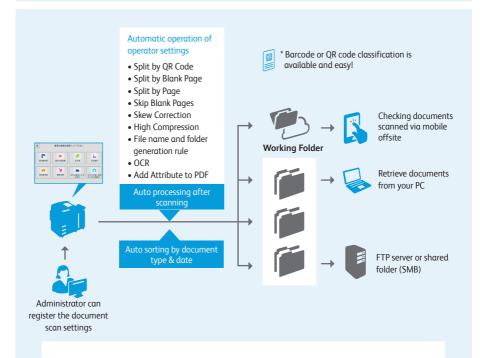

: SmartWhere, XPMS IM, SecuHub, etc., which have the most demand and request in the existing field, are included in Configuration.

# Scan Delivery

## Automated scan process only with the MFD

#### **NEW**

Scan Delivery simplifies the scanning process for documents that are standardized.

#### Key Features of Scan Delivery

- Fast and accurate scan by presetting the storage path with FTP / SMB / Working Folder
- Reduced unnecessary tasks with scan features including Skew Correction, Skip Blank Pages, and Auto Upright Orientation
- Auto sorting of scanned documents by QR codes / barcodes allows large amounts of documents to be electronically documented at once
- Quick search / browse for scanned documents saved in Working Folder anytime and anywhere
- Reduced risk of outgoing hardcopy data leakage through mobile access

# iPS (Image Portal Service)

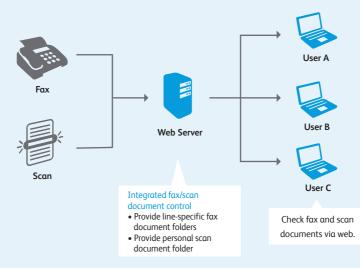

#### Maximization of Fax/Scan document control

#### **CURRENT**

- Unnecessary Fax documents accumulate.
- Fax documents are often lost.
- After scanning, it is hard to find documents.

#### **NEW**

- Check document without file conversion immediately after scanning.
- Electronic document control for faxing/scanning
- Prevent unnecessary fax printing through electronic documentation
- Provide convenient electronic documentation environment by user-specific access to the document control server
- Provide integrated document control server for faxing/scanning

### Key Features of iPS

- Reduce unnecessary printing and consumables cost
- Prevent loss/leakage of fax/scan documents
- Maximizing of fax/scan jobs' productivity

# **Smartwhere**

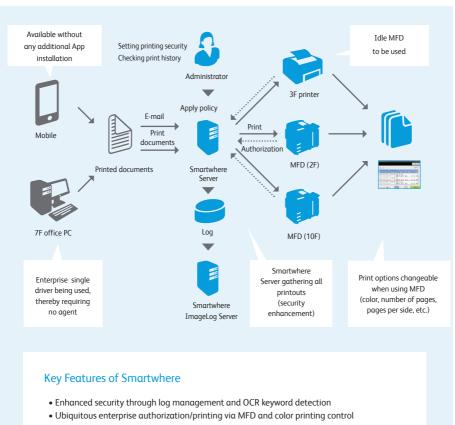

## Fuji Xerox Korea's document control and security solutions

#### **CURRENT**

- Cannot manage Sensitive Data Processing Department.
- Long waiting time in front of busy MFD.
- Cannot manage printing by each user/department.

#### **NEW**

- Job log collection & verification / security keyword retrieval & verification
- Ubiquitous enterprise authorization/printing via the MFD
- Allocate print quantity / block color usage / statistics and monitoring

 Management of user's/department's printouts (allocate print quantity, block color usage, and statistics, etc.)

# SecuHub

## Fuji Xerox Korea's Data Loss Prevention Solution (DLP)

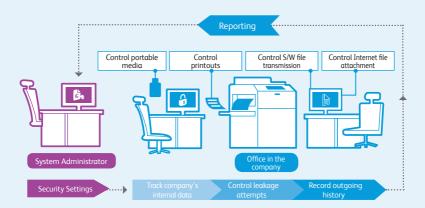

#### **CURRENT**

- Company's concerns about data leakage
- Difficulty to obtain evidence of important data leakage
- Risk of unauthorized leakage of company's personal information

#### **NEW**

- Block various data leakage paths via PC
- Data leakage log and original file can be verified
- Sensitive data document file detection, encryption, deletion and outgoing document file control
- The DLP solution prevents important data saved and printed via PC from being leaked and records the leakage history.

  The DLP solution is an integrated Data Loss Prevention Solution.

## Key Features of SecuHub

- Block data leakage via media control and software control
- Comply with Privacy laws through tracking/encryption of sensitive data
- Enhance print security by inserting watermark in printouts and controlling logs (and images)

## Server-less ODP

## Anywhere Printing solution that can be implemented without server

## **CURRENT NEW** • Want to implement Anywhere Printing without • Anywhere Printing can be implemented without server. • Work productivity is increased by reducing waiting expensive server costs. • Need to find ways to use multiple MFDs effectively. • Print security is enhanced via authorization/ • Need to find ways to enhance security for neglected important documents. printing. MFD 1 in operation MFD 2 1. User sends files to the 4. Files are transferred to 3. User selects to print an available designated MFD. MFD 2 for printing. MFD (MFD 2) to print the files. 2. Print task of MFD 1 is saved. Printout preview available Key Features of Server-less ODP • Convenience is improved so you do not have to wait in front of the MFD to print. • Server deployment and maintenance costs are reduced since no print server is required. • Printing security is enhanced with unnecessary printouts minimized by authorization/printing. • For convenience, customer can select ID from MFD and print without an authentication server.

documents

# Paperless Fax Delivery

**CURRENT** 

• Increased cost of printing unnecessary Spam Fax

## Implementation of Paperless Fax Environment via Fuji Xerox MFD

**NEW** 

Spam FAX

• Reduction of unnecessary printing cost via electronic reception of incoming fax documents.

Spam FAX

#### Increased workload for electronic documentation of • Reduced workload via auto reception of incoming fax important fax documents documents. • Support auto classification of incoming fax documents • Manual classification of incoming fax documents by sender by sender Paperless Fax Delivery (Chargeable) Paperless Fax Setup (Free) Incoming fax folders vary Automatic incomina Want to print only specific fax according to time/period fax classification by sender • An easy and quick setup on a • Fax folder changes automatically • Automatically generate and single screen • Setting changes automatically by deliver to sender-specific folder · Number of incoming fax set time/day/period • Easy fax classification by default documents at a glance · Ability to save information • Print important fax documents in PDF and DW file attributes only via preview [Example] 00 Company 00 Company XX Company XX Company Night: 20:00 to 08:00 Daytime: 08:00 to 20:00 Deliver to PC Print on paper

#### Key Features of Paperless Fax Delivery

- Automatically classify incoming fax documents by the sender's fax number (G3ID) and save them in the storage (shared folders)
- Exception handling (output, destination, classification) of incoming fax documents according to day of week or specific period.
- Ability to add file attribute values (PDF and DW) to retrieve incoming fax documents
- \* Data added: Received date/time, recipient information, sender information, processing status, name registered in address book, etc.
